PROJECTS

SHOPPER ► 198.199.120.206:8080

📅 2016 - 2 Week Development

Shopper is an eCommerce site built using the MEAN Stack, and was my personal project at DevMountain.

- Runner Up - Best Overall Project - DevMountain Personal Projects
- Elegant and fashionable design, with syncing sliders, effects, and selectable listing types
- Recreates functionality of Magento CMS, including tagging and cross-sells
- Admin section that allows products to be added, edited, and deleted

FOOS ► 198.199.120.206:3000

📅 2016 - 2 Week Development

Food Truck Online Ordering System (FOOS) allows restaurants to create menus which customers can place orders from. Built using the MEAN stack and Google Maps API.

- Food trucks can manage orders placed by customers, their restaurants information and menu, and check in to their current location.
- Implements Google Maps API and Yelp API to geolocate restaurant and pull restaurants information.

WORK EXPERIENCE

PV DESIGNER

🏢 Suncrest Solar 📅 2016

- Created PV Array Designs for residential and commercial customers using 3D modeling software
- Trained new employees on designing practices and standards
